SUMMARY

Results-driven Senior Software Engineer specializing in real-time data synchronization, cloud-native observability, and secure platform architecture. Demonstrated success at Salesforce transitioning legacy batch systems into highly reliable, real-time AWS pipelines. Award-winning engineer who effectively bridges the gap between complex infrastructure challenges and critical business objectives, consistently delivering secure, high-availability platforms while mitigating production risks.

WORK EXPERIENCE

Salesforce — Tableau Software

Feb 2025 – Present | San Francisco, CA

Software Engineer, SMTS

- Led transition from legacy batch processing to a real-time data synchronization pipeline, ensuring seamless data delivery across global regions.
- Established end-to-end monitoring across all deployment stages, significantly improving system visibility and accelerating incident resolution times.
- Overhauled deployment pipelines with stricter release controls and automated testing, reducing error propagation and catching regressions earlier in the lifecycle.
- Streamlined incident response protocols and cross-functional delivery, partnering with external teams to define scope, timelines, and resolve configuration bottlenecks.
- Pioneered AI-assisted development tooling, establishing team best practices that improved code review efficiency and reduced post-release defects.

Salesforce — Tableau Software

Apr 2021 – Feb 2025 | San Francisco, CA

Software Engineer, MTS

- Directed migration of core licensing services to a modernized internal platform, establishing scalable infrastructure and unblocking engineering workflows.
- **Spot Bonus (Q3 2023):** Drove monitoring migration to Grafana, eliminating external vendor costs and 30+ false-positive alerts through collaboration with senior engineering leadership.
- Implemented continuous availability monitoring across all public-facing endpoints, validating 99.95% uptime SLA targets.
- Designed automated health checks and performance dashboards, upgrading a core service to top-tier operational status and reducing detection-to-response times.
- Owned full CI/CD lifecycle for four critical licensing services; led Sev-3 RCAs and drove security upgrades to maintain compliance ahead of deprecation deadlines.

Microsoft (via Insight Global)

Aug 2019 – Apr 2021 | Seattle, WA

Software Engineer

- Designed enterprise-level test infrastructure for the Microsoft Office team using Ruby and Chef to automate macOS machine provisioning across multiple Office for Mac teams.
- Applied spec-driven design and Agile practices to validate new features and ensure cross-macOS-version supportability; contributed to open-source "macos-cookbook" on GitHub.

Tableau Software

Jan 2015 – Aug 2019 | Seattle, WA

Senior Technical Support Engineer

- Diagnosed complex application and latency issues at customer scale; improved team case-closing metrics by authoring KB articles for undocumented issues.
- Performed root-cause analyses using Tableau log files and troubleshooting tools, maintaining high customer satisfaction through clear communication and systematic follow-through.

TECHNICAL SKILLS

Cloud: AWS (Lambda, DynamoDB, SQS, SES, KMS, IAM, CloudWatch, ECR, Secrets Manager, ECS), Terraform, Kubernetes, Hyperforce

Observability: Splunk, Prometheus, PagerDuty, Argus, New Relic, Grafana, Fluentbit, Kafka

Licensing: Flexera/FlexNet, ECAP Licensing, Nexus | **AI Tools:** Cursor, Claude, Windsurf

CI/CD & DevOps: GitLab CI/CD, Falcon CI/CD (FIT), Bamboo, Docker, multi-env pipelines, MESH/Ingress networking

Languages & Frameworks: Python, Java, SQL, Spring Boot, Maven, JUnit 5, Gradle

Languages: English (fluent), Cantonese (native), Mandarin (conversational)

EDUCATION

Seattle University

Sep 2017 – Jun 2020

M.S., Computer Science — GPA 3.7

Graduate Certificate, Computer Science Fundamentals

University of Washington, Seattle

B.S., Applied & Computational Math Sciences

Concentration: Discrete Mathematics and Algorithms · Minor in Mathematics and Applied Math

Sep 2009 – Jun 2013
